

Outlook Connector for MDAemon

Groupware Flexibility using the MDAemon Messaging Server

Key Features

- **Outlook Collaboration** — Share Outlook messages, calendars, contacts, distribution lists, notes, tasks, and more using MDAemon as the messaging server.
- **Simple Licensing Structure** — Outlook Connector's license size does not have to match that of MDAemon. Only purchase a license size that is large enough to accommodate those users who are going to use Outlook as their groupware solution.
- **MDAemon Simplicity** — Simple to install, configure, and maintain without the need for extensive computer background or expensive certifications.
- **Mixed User Environment** — All groupware data, such as calendar events, tasks, contacts and notes, can be viewed in Outlook using Outlook Connector, or in WorldClient®, MDAemon's webmail client. Changes made in Outlook using Outlook Connector will also be reflected in WorldClient, and vice-versa.
- **Open Protocols** — Uses Industry standard STMP and IMAP protocols to make operations reliable.
- **Outlook Features** — Works with popular Outlook features, including message grouping.

Outlook Connector for MDAemon opens up the groupware collaboration functions of Microsoft Outlook® by using MDAemon® as the email messaging server. With Outlook Connector for MDAemon you can stay in touch with employees, co-workers, customers, and vendors by sharing Outlook's email, calendar with free/busy scheduling, address book, distribution lists, tasks, notes, and more. Just like MDAemon, Outlook Connector is designed for businesses with little or no IT support. Its simplicity, affordability, and extensive features make Outlook Connector for MDAemon the most productive way to use Outlook's groupware collaboration tools.

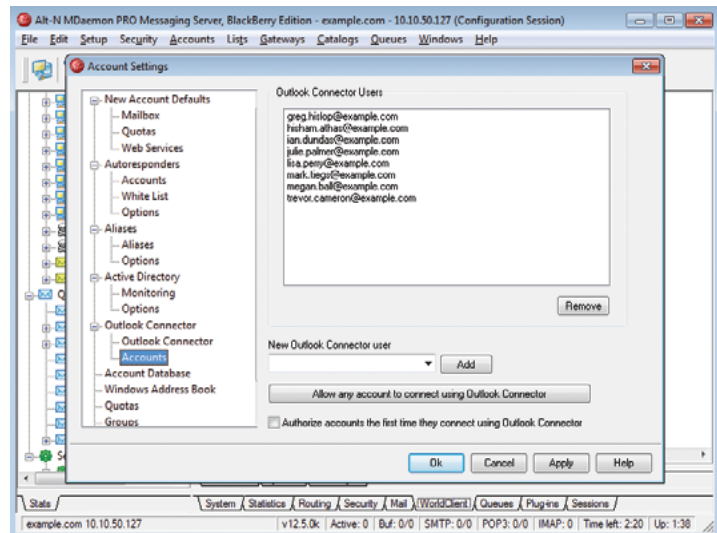

Calendar sharing is easy with Outlook Connector, with permissions ranging from view only to add, change, and delete appointments on others' calendars.

Key Benefits

- **Productivity.** Enables users to work with the familiar tools of Outlook without learning a new groupware application.
- **Enterprise Class Collaboration.** Large business collaboration features without expensive mail server support requirements.
- **Small Business Licensing and Pricing.** Licensing and pricing designed for flexibility and affordability.
- **Full Integration with MDAemon.** Seamless integration with the built-in groupware collaboration functions of WorldClient, MDAemon's webmail client.
- **Simple Administration.** Easy installation, configuration, and maintenance.
- **Investment Protection.** Includes one year of renewable Upgrade Protection, providing free upgrades to the latest product versions for the duration of the Upgrade Protection term.

System Requirements

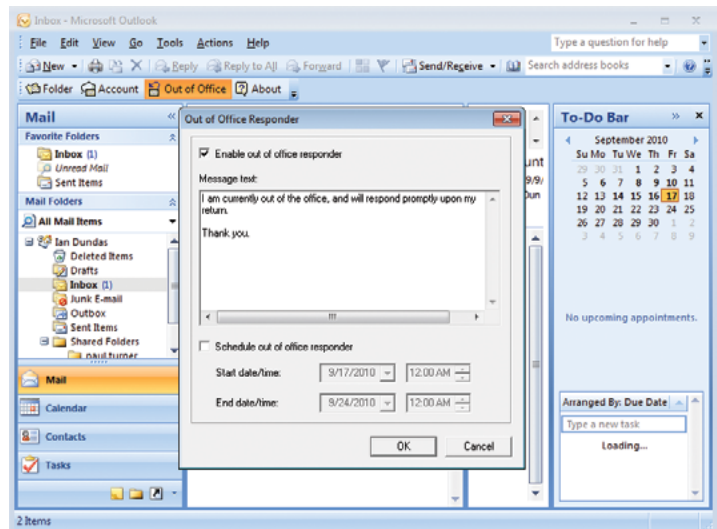

- MDAemon 9.0 or higher is recommended
- Outlook Connector requires the latest Microsoft® Service Pack be installed. Outlook 2000 also requires the "Post-Service Pack 3 Hot fix Package July 3, 2003," available from Microsoft Support
- Microsoft Windows XP/2000/2003/Vista®
- Pentium® 4 2.4 GHz processor or higher is recommended
- Outlook 2002/2003/2007®
- Network Interface Card (NIC) with TCP/IP network protocol installed
- Internet or Intranet communication capabilities

Add Outlook Connector users in MDAemon.
